Our Global Fight Against Diabetes

At home in rural Piura, Peru, Elizabeth worried about her health.

Her younger sister had diabetes, but how could Elizabeth learn if she herself was at risk? A medical test would be expensive for this single mother. When Elizabeth heard AmeriCares was offering free blood testing near her home last March, she lined up to be one of 730 people screened. To her relief, Elizabeth’s test results were normal.

The free screening Elizabeth attended was just the first step in a year-long diabetes project AmeriCares is managing in Peru with support from Bristol-Myers Squibb. Our local partners in the area, Peru-VIDA and Piura Fair Trade, will follow 250 diabetic and pre-diabetic patients and provide various treatment and educational materials for those patients and their families and friends.

Peru is just one country where AmeriCares is helping to educate, screen and treat people with this chronic disease. Last year, AmeriCares distributed diabetes medicines to 56 countries worldwide.

In the U.S., where an estimated 1.2 million uninsured residents have diabetes, our Chronic Disease Initiative makes educational materials and therapies available for clinics’ low-income patients. Many of our 550 U.S. partners also provide their patients with the medicines and supplies we donate. In just the last two years, AmeriCares donated 4.6 million insulin syringes and nearly 1 million pen needles, both provided by the medical technology company BD.

“Having these products on hand increases patient compliance and lowers risk of amputations, vision loss, kidney failure and other serious complications of diabetes,” says Dr. Frank Bia, AmeriCares medical director.

Screening, education, medicine, supplies and support for clinics: AmeriCares is involved in every step necessary to combat this global disease.

In Peru, AmeriCares provided free diabetes screening for an entire community (top). AmeriCares is delivering medicines for Syrians like this child in a refugee camp in a Turkish border town (right).
In April and May, AmeriCares delivered two emergency air shipments to Mali to help alleviate a critical shortage of medicines in the country’s war-torn North. A recent spike in the conflict has exacerbated the effects of a lingering hunger crisis. Emergency medical aid is urgently needed to curb the spread of deadly diseases like malaria and cholera.

An estimated one in five households in northern Mali face severe food shortages, a situation likely to worsen. With nearly 300,000 people displaced within the country due to the conflict, hunger and malnutrition pose additional challenges to the health and well-being of vulnerable Malians.

This latest shipment is a follow-up to an emergency module AmeriCares sent last summer, which contained enough water purification packets to provide clean water for 25,000 people. AmeriCares is working with the emergency response agency of the Malian government to keep abreast of critical needs in the country.
AmeriCares continues to help homeowners and health centers struggling to recover from Hurricane Sandy. In just over six months, AmeriCares aid has reached an estimated 400,000 people through the 100 health care organizations and local relief groups we have supported with medicine, funding and supplies. In all, AmeriCares has provided more than $5 million for Hurricane Sandy emergency response and recovery. We are focusing on four areas: meeting immediate needs; restoring health services; addressing long-term health problems including mental health issues; and preparing for future emergencies.

One highlight: We are funding counseling programs in schools. “If we can give kids the tools to cope with a traumatic experience, research has shown we can prevent long-term mental health issues,” says Garrett Ingoglia, AmeriCares vice president of emergency response.

After volunteer physician Dr. Jeffrey Wilkinson performs his fistula repair surgery at Bwaila Hospital in Lilongwe, Malawi, there’s one more important step: He must prevent infection. An obstetrical fistula is a disabling condition causing chronic urinary incontinence in women, usually the result of prolonged labor. Preventing infections after fistula surgery is challenging, but thanks to donations from Fresenius Kabi USA (Formerly APP Pharmaceuticals), Dr. Wilkinson and other fistula surgeons can confidently treat patients with the highly effective broad spectrum antibiotic piperacillin/tazobactam.

Fresenius Kabi first supported AmeriCares after the 2010 earthquake in Haiti with donations of injectable medicines. The health care company continues to donate to AmeriCares emergency pharmacy.

Fresenius Kabi’s injectable medicines such as anticoagulants, anesthetics and antibiotics still carry the well-known APP brand and are highly sought after by volunteer doctors traveling on outreach trips to treat patients who are critically and chronically ill. The company routinely directs doctors to AmeriCares Medical Outreach staff, who coordinate donations. In just three years, Fresenius Kabi has donated more than $1 million of medicines to volunteer doctors through AmeriCares Medical Outreach program.

In addition to providing medicines for emergency medical stocks and medical outreach, Fresenius Kabi has provided injectable medicines for AmeriCares ongoing global medical aid. In all, Fresenius Kabi has donated more than $7.7 million in injectable medicines, reaching patients in 72 countries.

“Fresenius Kabi is a valued partner in our work, helping us save lives and improve the health of people all over the world,” says Geoff Kneisel, AmeriCares vice president of corporate relations.

Financial advisor Carl Bailey is on a mission: To help people unable to help themselves. AmeriCares is Carl’s partner. Not only does Carl give to AmeriCares, but AmeriCares donates crucial medicines to charitable medical groups that Carl funds and organizes.

Carl began supporting the Boehringer Ingelheim AmeriCares Free Clinic of Danbury after he founded a tennis and mentoring program for disadvantaged children in Danbury, Conn. He referred participants’ parents to the clinic and was so impressed, he began to make donations. “I experienced firsthand the respect and care patients received there,” he says.

After the market sell-off of 2000 through 2002, Carl took a sabbatical to Nicaragua in 2004. Alarmed at the lack of basic medicines and medical supplies, Carl contacted AmeriCares. Now, AmeriCares Medical Outreach program donates medicines, products and equipment to medical volunteers traveling to Nicaragua to provide care — all through nonprofit medical groups Carl organizes.

Financially secure, Carl wants to be sure that his estate helps others — now and in the future. With his focus and drive, that’s already happening. By making AmeriCares and other charities beneficiaries of his retirement assets, Carl knows his philanthropy will continue even after his lifetime.
Your Donations at Work in 60 Countries

Afghanistan  Costa Rica  Ghana  Kenya  Nepal  Peru  Tanzania
Albania  Dominican Republic  Guatemala  Laos  Nicaragua  Philippines  Thailand
Armenia  Republic  Guyana  Lebanon  Nigeria  Poland  Togo
Bangladesh  Democratic Republic of Congo  Haiti  Liberia  North Korea  Romania  Tunisia
Belize  Honduras  Malawi  Pakistan  Rwanda  Uganda  Turkmenistan

Cambodia  Myanmar  Nepal  Solomon Islands  Somalia  Vietnam  Uzbekistan
China  Ethiopia  Nicaragua  St. Kitts
Colombia  El Salvador  Panama  Tanzania

Haiti: An AmeriCares-sponsored health fair reinforces hand washing as a key step in cholera prevention. We continue to help the country recover from the 2010 earthquake.

Sri Lanka: Little Tharani is recovering well in the new hospital wing AmeriCares built for Trinomalee District Hospital, part of our 2004 Southeast Asia tsunami response. Our work there is helping communities rebuild stronger.

Japan: For elderly Japanese who lost everything in the 2011 earthquake and tsunami, an AmeriCares-funded gardening program eases stress.

United States: On the New Jersey shore, Michelle and her son Jonathan celebrate AmeriCares installation of a new wheelchair ramp to their home, which was damaged by Hurricane Sandy.

With your help, between January 1 and March 30 AmeriCares sent medicines and medical supplies to the following countries:

AmeriCares
AmeriCares is a nonprofit global health and disaster relief organization that delivers medicines, medical supplies and aid to people in crisis around the world and across the United States.
